

# Mark Your Calendar...Bring The Family! Bright New Stars Debut January 23rd

#### WATCH BRIGHT NEW STARS DEBUT ON SCREEN AT OUR JOHN DEERE '86 EARMING FRONTIERS

New tractors, forage harvesters, disks, and even a new combine will be shown in big screen action at our John Deere Farming Frontiers. We're introducing the economy, efficiency, and practicality available with new John Deere machinery. And we'll be spelling out how our dealership offers you those same three advantages from a company with:

# NEW FOR'86

## John Deere brings you a new level of 4-row performance with the 4425 Combine

More power, taster harvesting, more comfort and performance. It's all together in the new 4425 Combine. Here are some of the features:

- Sound-Gard<sup>®</sup> styled cab
- 117-hp engine
- Quick-Shift transmission
   Day Transmission
- Posi-Torq<sup>™</sup> ground drive
  125-bushel grain tank
- 125-busnel grain tank
   closed style unloading auger
- fast unloading (1½ minutes)
- 79-gallon fuel tank

efficient single-pass threshing
 And there's more. Famous John Deere
harvesting heads work on the 4425 to get
partial the yield your field heats offer.

The production of the partial forms of the partial field heats offer.

The production of the partial field heats offer.

The production of the partial field heats offer.

The production of the partial field heats of the partial field heat

harvesting heads work on the 4425 to generally all the yield your field has to offer. And if you should plug the header or feeder house, a reverser (standard) can back it out at the touch of a lever. The 4425 keeps you moving down the rows.

The 4425's ground drive features

The 4425's ground drive features John Deere's reliable Posi-Torq™ system. The variable-speed drive belts are automatically tightened at peak drive loads. This prevents belt slippage and increases belt life.

For easier shifting between gears there's the new, Quick-Shift transmission. This transmission makes it smooth and simple to change directions or gears. Just depress the clutch and give a short push of the shift lever. The Quick Shift transmission and the variable-speed Posi-Torq ground drive work together to give you just the right harvesting speed for maximum performance.

If you combine some rocky fields, you'll like the standard dump-type stone trap. Stones drop into the trap while you combine. You enjoy cylinder protection, non-stop harvesting and simple dumping of the trap at your convenience

There's speed and greater performance with the new 4425 Combine.
