1 Steve A Shetterly Millersburg 2 Harold C Rader Jr Connoquenessing 3 Tracy Buffington Millersburg
Senior Champion
Debra Shetterly
Reserve Sr Champion
Heather L Hernley
Grand Champion
Debra Shetterly
Reserve Grand Champion
Heather Hernley

WESTFALIA HIGH TECH DAIRYING®

Don't play with other people's toys

Manage your dairy with Westfalia

Breed Management

Milk Storage

Feed Individual cow feed control throughout the day. Automatically provides exception reports to detect cows off feed. Feed can be specially rationed for milk production, body weight and energy needs.

Milk Accurately monitors each cow's milk production and automatically notifies operator if cow is off milk after cluster removal. Also, after cow ID is entered, cow side control box automatically signals for observation of cow for heat, do not milk or health code needs. These functions are available when system is connected to Codatron.

IBM® Interface Westfalia's Dairy Plan is designed to totally integrate herd, feed, breed, milk and reproduction programs within one software package. Features direct interfacing capabilities with IBM® or 100% compatible machines.

Breed Cow calendar for each cow to signal operator to check for heat, breed, pregnancy check and automatic warm up prior to calving. Also provides calving interval reports.

Codatron Dedicated independent microprocessor to provide on-line control of all Codatron feed, breed and milk programs even while personal computer is doing other tasks.

Metatron Individual cow side micro-processor provides the information you need for total milk yield, automatic take off, maximum milk flow, average milk flow and milking time. When connected to Codatron, it provides reports on milking.
