

Because every farm is different, we develop different alfalfa varieties.

Your farm is different from that of your neighbor; different soil types, perhaps, or different disease and insect problems. And that may be the best reason yet for using Pioneer® brand alfalfa seed in your individual alfalfa management program.

Thanks to our large and continuing alfalfa research effort, you have a number of different varieties to choose from. There's one that will fit your farm better than any other variety you can buy; and that's the one you should be planting to maximize your long-term alfalfa yields.

Which one? Well, your Pioneer sales representative will be glad to match one of these varieties to your farm conditions and help you start getting more alfalfa from every field on your farm. So give him a call. He's right down the road.

BRAND SEEDS

Your best start.

526

As proven in tests, 526 is one of the most winterhardy varieties on the market. It also features outstanding resistance to Bacterial Wilt and good resistance to Fusarium Wilt. 526 produces impressive yields throughout this area and, since the first cutting is a bit later than with 531 or 532, the harvest load can be easily spread.

531

With its ability to tolerate Anthracnose infestations and fight off Fusarium Wilt and Bacterial Wilt, 531 is quickly becoming a favorite in areas where these diseases are a problem. It produces a first cutting early and the fine stemmed, leafy plants bounce back fast after harvest — providing ton after ton of high quality forage.

532

532 establishes a stand quickly and its fast regrowth can mean an extra cutting each season. Strong resistance to Bacterial Wilt and Fusarium Wilt, along with very good field tolerance against Phytophthora Root Rot, all go into making 532 one tough, winterhardy alfalfa variety.
