

# THIS YEAR PLANT MORE CUTWORMS.

Pounce® 3.2 EC insecticide, used pre-emergent, controls more cutworms with a longer residual effect than Lorsban® insecticide. It even controls true armyworms in the bargain.

And it really is a bargain. Because Pounce isn't just a whole lot better than Lorsban, it's a whole lot cheaper — about half the price.

And since Pounce can be tank mixed with more herbicides

and fertilizers than any other insecticide, it's the exact solution for the problem.

one of the strongest guarantees in the industry. Pounce. Better. Cheaper. Guaranteed. Money-back guarantee. Call your dealer or custom applicator for Pounce insecticide now.
