**ATTENTION FARMERS!**  
**Don't Let Your Silo Deteriorate**

**If Your Silo Looks Like These... For Safety Sake,  
We Recommend That You Don't Fill It.**

**RESURFACES INTERIORS:**

- Coats the silo's interior
- Protects feed in storage
- Durable, tough, acid-resistant
- Increases useful life
- Economical

**Before** The silo's interior with plaster damaged and stave exposed

**After** The surface is reconditioned, and a new, thick, tough surface will protect stored feed

**REPAIRS HOLES:**

- Repairs even large holes
- Up to twice the strength of the original stave
- Rapid application
- Durable surface

**Before** A hole is worn completely through the silo wall

**After** With the hole repaired by ShotCrete and a new surface applied, the silo is ready for years of use

**EXTENDS USEFUL LIFE:**

- Support for old foundations
- Special repairs can be made quickly and economically
- Little or no forming needed
- Stronger than the original

**Before** The bottom part of the staves are completely worn away

**After** The ShotCrete System repairs and replaces the missing structure

**When you think your silo is beyond repair  
Think of ShotCrete**
