

# Cuomo honors Cornell extension

ITHACA, NY — Governor Mario M. Cuomo has issued a special proclamation honoring Cornell Cooperative Extension for the 75 years of service that its agents have provided the people of New York State.

The proclamation designates the week of March 9-15 "Cornell Cooperative Extension Week." That coincides with the 75th anniversary of the appointment of the first county agent in New York State.

"In the seventy five years since that auspicious event, Cornell Cooperative Extension agents have been invaluable friends and advisors to the people of New York State," the governor said in his proclamation. "Indeed, they are the principal intermediaries through which residents of the state... derive benefit from the wide range of research activities and educational programs at Cornell University, the state's land-grant institution."

In addition to the governor's proclamation, the state legislature is expected to act on a resolution commemorating that anniversary.

On March 1, 1911, John Barron of Broome County became the first agent at Binghamton. Barron later served as an extension professor of agronomy in what is now the New York State College of Agriculture and Life Sciences at Cornell. He pioneered the role of Cornell Cooperative Extension agents who today serve in every county of the state and in New York City.

"Working in each of the state's 62 counties, Cornell Cooperative Extension agents serve individuals, families, businesses, and communities in rural, suburban, and urban areas," Cuomo said. "They enrich the lives of their fellow New York State residents by planning and implementing an impressive variety of programs pertaining to agriculture and natural resources, community issues, 4-H activities and youth development, home economics, and Sea Grant."

"By taking active leadership roles in their communities," Cuomo noted, "Cornell Cooperative Extension agents make particular contributions in areas that include... nutrition education; farm business management; housing improvement; family concerns;

energy conservation; the development of coastal resources; land-use planning; dairy, livestock, and field-crop production; home and commercial horticulture; and the expansion of tourism."

Cornell Cooperative Extension Week will be highlighted by the 51st annual 4-H Capital Days celebration in Albany, March 10-11. Each year, about 100 4-H members from throughout the state travel to Albany to meet state officials and to learn about the workings of the state government.

Cornell Cooperative Extension is part of the national Cooperative Extension system, which was established in 1914. Before that time, extension work was carried on informally by agricultural and youth organizations on local and state levels.

## Farm management project underway

NEWARK, DE — The Delaware Cooperative Extension Service, with advice from a panel of farmers, will initiate a three-year farm management program in March. The goal of the project is to help farmers become more efficient managers through record-keeping and long-term analysis of individual fields and farms.

Initial meetings to launch the effort will take place at 1 p.m. in all three counties as follows:

- New Castle County - March 11, Kohl Demonstration Farm, Route 301 west of Middletown.
- Kent County - March 13, Kent County Extension Office, Room 2206, 300 S. New St., Dover.
- Sussex County - March 10, University of Delaware Research and Education Center, Route 9, Georgetown.

Farmers who wish to participate beyond the initial meeting will be charged a registration fee of \$10 to cover the cost of materials. To preregister, contact the extension county agent in Newark, Dover or Georgetown.

## Maryland sends spray notices

ANNAPOLIS, Md. — The Maryland Department of Agriculture is mailing gypsy moth spray notifications to residents living in proposed spray areas throughout the state.

These notices are printed on 8½"x14" legal size paper, folded in quarters and stapled closed. "IMPORTANT!" and "OFFICIAL

NOTICE" appear on the front of the folded notice along with the state seal. Residents who receive one of these notices in the mail are being asked not to throw it away.

The notice contains information concerning the property to be sprayed, how the program works, how to keep informed about gypsy

moth spraying in your area, time and place of any informational open houses, and what you must do to object. Also, this year's notice contains detailed information on both insecticides used - B.t. (*Bacillus thuringiensis*) and Dimilin.

Property owners who receive one of these notices but do not want their property to be sprayed must let the department know of their objection in writing. All letters of objection must be postmarked by March 26, 1986. For more information contact Robert Tichenor or Nathan Erwin at 841-5922.

## Crop insurance signup to end

NEWARK, DE. — Delaware, Maryland and New Jersey farmers interested in buying multi-peril insurance for their 1986 green pea or potato crops have until March 15 to sign-up.

"This is the first year that all crop insurance contracts in these three states will be based on individual farm production records," says University of Delaware assistant farm management specialist Mark Kooker. "Most farmers will find these new programs to be less expensive and also better at meeting their risk management needs."

Multi-peril crop insurance is offered through the Federal Crop Insurance Corporation, an agency of the U.S. Department of Agriculture. Policies insure against essentially all unavoidable hazards, including drought, freeze, hail, excess moisture, wind damage, insects and diseases.

There are several ways area farmers can find out about insuring their crops. They can contact an agent who sells crop insurance, or call their county extension office. In addition, growers interested in obtaining a computerized analysis of the cost versus the benefits of using multi-peril crop insurance on their farm can contact Kooker directly at (302) 451-2511.
