DEAL WITH THE LEADERS IN FORAGE PRE-SERVATIVE PRODUCTS
THE PERFECT COMBINATION... BEACON FAST DRY AND BEACON
HAY PRE-SERV

Field-drying forage should be this easy.

The longer legume forage lies in windrows drying, the more it loses weight, protein, nutritious leaves, and digestibility.

That's money lost.

Dry it faster. With Beacon Fast-Dry Forage Conditioner.

You'll get better forage — and more of it — out of the field faster. You'll also reduce yellowing of new growth, crop loss, and damage to the forage by weather and equipment.

ALSO AVAILABLE:

- * Beco-Lac - stabilized source of micro-organisms, the guaranteed live lacto bacillus silage preserve.
- * Beacon Liquid and Dry Silage Preserve.
- * Beacon Hay Pre-Serv.

GONE WITH THE WIND?

When leaves crumble and blow away, you're out protein and money.

Beacon Hay Pre-Serv can put an end to leaf shatter. Dryness can cause nutrients to blow away, disappear in the fields or on the wagon. That not only robs cows of the protein they need, it means you have to purchase more protein for your dairy ration.

With economical, easy-to-apply Hay Pre-Serv, you can cut at up to 25% moisture, and get less leaf shatter, more palatable hay, and 10% more of it! You can bale earlier in the day or later in the evening, and even on cloudy days when the hay is well above 18% moisture.

So start using Beacon Hay Pre-Serv and put an end to nutrients and proteins that are gone with the wind. Start saving today... see your Beacon Advisor or Beacon dealer.
