100's of Satisfied Users

DE LAVAL

The De Laval® DV-300™ milking system senses milk flow and automatically shifts vacuum levels and pulsation rates for stimulation, milking and post milking. That means less stress on your cows and improved milking routine for you. The DV-300 milker . . . the flow controlled milking machine that brings affordable semi-automated milking to all types of dairy operations. See us for full information on the DV-300 milker and the full line of De Laval dairy equipment, all designed to make you a better, more profitable dairyman.

Satisfied Customers Depend Upon Satisfied Work

The clear strength advantage of the new Calumet S-3750 spreader tank

You see it first in the "over-built" undercarriage.

We wanted an exceptionally strong 3750 gallon liquid spreader tank. We got it by using the undercarriage from our big 4500 gallon spreader. We also used the bigger model's 18 x 22.5 16 ply tires on

4 inch spindles and 16000 lb capacity hub. And like all Calumet tanks, the new S 3750 features extra strength flanged heads and continuous finished welding of tank to frame (instead of skip welds). The S 3750 operates from 540 or 1000 RPM PTO or optional hydraulic motor drive. It accepts our 2 or 4 shank soil injectors. Four wheel hydraulic brakes are controlled from the tractor cab.

Liquid level indicator is standard. And the price is right. If you're thinking about a new tank, see the new competitively priced S 3750 at your Calumet distributor. Other models offer 2250, 3250, 4500 and 6500 gallon capacities. All are built strong as a Calumet by the strong company in liquid manure equipment.
