

New Idea adds disc mower line

COLDWATER, OH — A new generation of Disc Mowers is being introduced by New Idea Farm Equipment Division, Coldwater, Ohio. Mr. Tom Kinzenbaw, Vice President of Marketing, says the Disc Mower is added to their continually growing line of haytools to meet the needs of the American farmer and rancher for high speed, non-plug mowing.

Mr. Kinzenbaw states that the "new generation" concept is to

provide the American farmer and rancher with a Disc Mower that is unique in design, simple in maintenance and Americanized to guarantee New Idea quality.

Unlike disc mowers with gear driven cutterbars, New Idea's Disc Mower cutterbar is designed with a single drive shaft that drives modular, sealed disc units. These sealed disc units rotate the cutting discs, providing a fast, clean cutting performance even in difficult conditions. With the sim-

licity of New Idea's cutterbar design, infield servicing is easy, requiring no special tools.

New Idea's Disc Mowers are available in three models: Model 526 (5'6" cutting width), Model 527 (6'8" cutting width), and Model 528 (7'10" cutting width). Each model is equipped with a hydraulic cylinder for easy positioning of the cutterbar to the transport and operating modes.

All Disc Mower models will accommodate both Category I and II tractors and feature a massive frame for the rugged durability needed with high speed performance. V-banded power belts provide a long service life and are fully enclosed for protection.

New Idea's Disc Mowers also feature a PTO with an overrunning clutch as standard equipment. The 520 Series Disc Mowers have been designed with a breakway feature to protect the unit from damage when hitting rocks or other obstructions while mowing.

One of the most advanced mowers available for the American farmer, New Idea's 520 Series Disc Mowers provide high capacity mowing in all hay crops including Timothy, Bermuda, Bahaya, Orchard Grass and Prairie Grass.

The Model 528 disc mower from New Idea.
