

MUNCY-CHIEF SX777

220.9 Bushel Shelled Corn Per Acre
#1 QUALITY #1 YIELD #1 POPULARITY
FOR GRAIN AND SILAGE IN THE
NORTHEAST AND MID WEST

MUNCY-CHIEF SX777 SINGLE CROSS

Muncy-Chief SX777 holds National Record in 1977 of 265 Bu. per acre and in 1976 of 251 Bu. per acre checked by Vocational Agricultural teachers in New York and Pennsylvania, and again in West-Virginia, 258 Bu. in 1980. Muncy-Chief SX777 has always been a corn hard to beat. Muncy-Chief SX777 differs in that the male or pollen parent contributes a thicker ear, more yield and thicker planting from 1,000 to 2,000 plants per acre than many hybrids of similar maturity.

Muncy-Chief SX777 carries its ears well and has an excellent stalk and root system. Recommended from Pa. to Ga. and the Mid West for grain and silage. It has a good portion of TDN, Matures for silo in 100 days, 110 to 115 days for grain.

In the 1980's - 1980, 258 Bu. Acre; 1981 - 217; 1982 - 246; 1983 - 272; 1984 - 244; Joe Stump record 1985 - 220.9; Order the Best - Some or a few bushels of Muncy-Chief Hybrids.

NEW MUNCY-CHIEF AND XA HYBRIDS AVAILABLE FOR 1986 PLANTING

XA MEANS: Better adaptability, Better Standability, Less Disease, Less Insects, Better Health, More Yield. Bred thru research and intensive selection of inbreds, single crosses, and from production fields. These selections have been bred into some of our Muncy-Chief Hybrids. Some of this seed is short supply and offers and supplies are unsold at time orders are received.

Promotion funds to continue

NEW YORK — A plan whereby dairy farmers contribute money for milk promotion activities of the American Dairy Association and Dairy Council, Inc., headquartered in Syracuse, New York, was approved today for another year by Thomas A. Wilson, Market Administrator, New York-New Jersey Milk Marketing Area. These milk promotion activities include advertising, nutrition education, publicity for dairy products, marketing and product research, and informational services.

This year the deduction under the "positive letter" will again be applied as a credit against the 15 cents per hundredweight dairy promotion deduction required by the Dairy and Tobacco Adjustment Act of 1963. Up to 10 cents designated by producers for an approved local promotion programs such as that of the American Dairy Association and Dairy Council, Inc. is eligible as an offset to this mandatory 15-cent deduction.

Mr. Wilson said that today's action allows handlers regulated by the marketing orders to send "positive letters" to their dairy-farmer suppliers. A dairy farmer who receives a letter will be considered to approve, for one year, deductions of 10 cents per hundredweight from his monthly milk checks, unless he notifies his handler in writing that no deduction should be made.

Moneys deducted from payments for milk delivered on or after May 1, 1986 will be paid directly by the handler to the American Dairy Association and Dairy Council, Inc., Syracuse, New York.

The Market Administrator explained that participation in the local program is voluntary for both handlers and producers, and a participating producer may have deductions stopped at any time by notifying the handler. A producer who receives no letter need not contact his handler since no deduction will be made for the local program.

In approving the plan for the coming year, Mr. Wilson pointed out that there has been no substantial opposition to the use of the positive letter procedure by producers.

Use of the positive letter approach was requested by Dairylea Cooperative Inc., and Eastern Milk Producers Cooperative Association, Inc.
