### EXCITING NEW CONCEPT FOR SAFETY & COMFORT "THE SEAT BAR"

Multi-purpose padded seat bar is in place at top of cab. When operator is seated, he fastens seat belt before pulling down seat bar. Rear window serves as emergency exit, if necessary

Seat bar allows adequate body clearance for range of operator sizes. Bar is quickly, easily pulled down by hand and secured at waist level, providing additional restraint protection that prevents operator from falling forward.

With bar in place, spring lock is disengaged, activating foot pedals which operate loader hydraulics. Foot pedals are locked when bar is in 'UP' position, preventing lift arms from moving.

Ahead of its time... to keep you ahead of your work
