Mushrooms can now be explosion-puff dried by a government-patented process, stored for over a year, then restored with high flavor and texture for cooking. The process has the potential of expanding mushroom exports and U.S. sales. Conventional drying methods that can leave mushrooms too chewy, and with off-flavors, have been unacceptable to the U.S. mushroom industry. The puff dried mushroom is also an appealing snack or crouton — light, crunchy with concentrated flavor.

X X X
Sour rot — the most pernicious destroyer of tomatoes after ripening — can be controlled by a chemical known to check sour rot in citrus. Sour rot is caused by *Geotrichum candidum*, a pathogen that also attacks harvested carrots, cucumbers, and peaches and makes them decay. Dipping tomatoes in the experimental fungicide guazatine takes only 20 to 30 seconds, yet cuts the incidence of sour rot to about 5% compared to 50% in untreated tomatoes. Fungicide treatment would benefit growers, shippers, and retailers as well as consumers of fruits and vegetables.

ARTS-WAY

REAR-MOUNTS

Featuring gear-box drive for better power economy and quieter operation

Our low-profile gear box is positioned up front on the mower deck for closer, more level alignment between mower and tractor PTO for reduced shaft flexing, vibration and U-joint angling. You get more efficient transfer of PTO power to the mower for better fuel economy, quieter operation and longer life.

Other outstanding Arts-Way features include — ■ High-suction blades for cleaner cutting ■ Anti-windrow design ■ No-twist belt patterns ■ One-Year Limited Warranty.
