UNMATCHED SERVICEABILITY

Rollback ROPS/FOPS

The entire ROPS/FOPS structure rolls back and out of the way and locks in up position for full and easy access to drive and hydraulic components. This structure is spring counter-balanced for easy, one-man rollback. The wiring harness stays intact for better serviceability.

Once the ROPS/FOPS is rolled back the engine and driveline are fully accessible for service. No crowding or extraneous plumbing; just well laid-out. Designed with the service technician in mind.
