Tough Hay?

It's ready for baling with Culbac!

CULBAC® Liquid Hay Treatment preserves high moisture hay when applied at baler or swather.

The effectiveness of CULBAC in preserving high (18-23%) moisture baled hay has been demonstrated by university and field research as well as many years of successful experience by CULBAC-users.

- **UNIVERSITY RESEARCH** — New Mexico State University research has shown "CULBAC effectively preserved hay baled at up to 23% moisture," and "CULBAC and propionic acid were equally effective." Arledge, et. al. 1983-85
- **MORE PROTEIN & HIGHER YIELD** — Field trials* demonstrated CULBAC-treated hay contained more protein and yielded more dry matter than low moisture hay.
- **SAFE, EASY TO APPLY, NON-CORROSIVE.**
- **ECONOMICAL**, less than \$2 a ton
