

“My Bravo sprays beat anthracnose.”

Joe O'Neal • Seaford, Delaware

When you listen to Joe O'Neal tell it, he's got some pretty solid reasons for counting on Bravo® fungicide.

“I know one thing, it's a lot easier to prevent anthracnose than to try and cure it.

“We spray Bravo on a 7-day interval and stay with it. Been doing that for five years now. And I can say this, if you start your Bravo on time, you'll beat anthracnose regardless of the pressure.

“It's foolish to cut back and try to save a buck because if you lose the fruit, you don't harvest the fruit. As far as I'm concerned, Bravo is the cheapest of any trip across the field.”

For tough tomato diseases like anthracnose and blight, there's no better fungicide than Bravo.

As Joe O'Neal puts it, “I look at Bravo as an asset.”

Bravo. Because you give it all you've got. Fermenta Plant Protection Company, 7528 Auburn Road, P.O. Box 348, Painesville, Ohio 44077.
