**Hamilton Bank Expands Agri-Finance Department**

LANCASTER — The Agri-Finance Department at Hamilton Bank has doubled in size with the addition of two lending officers.

They are Roger M. Rohrer of Strasburg and Jeffrey R. Troutman of Millerstown, both assistant vice presidents. They join Darvin E. Boyd, vice president and director of agri-finance, and John E. Moose, vice president and assistant director.

"These appointments serve to reinforce our Bank's commitment to agriculture," Boyd said. "We are fortunate to acquire the services of such highly-qualified agri-lending officers as Roger and Jeff."

Rohrer most recently was vice president for operations of Lancaster Farm Credit Service, which he joined in 1974 as a loan officer.

A graduate of Pequea Valley High School, Rohrer attended the Pennsylvania State University and has completed numerous professional training courses. He and his wife, Kandy, have two sons and a daughter.

Troutman, who holds a B.S. degree in agricultural business management from Penn State, has most recently been the Lancaster county supervisor for the U.S. Department of Agriculture, Farmers Home Administration.

He joined the Farmers Home Administration in 1981 as assistant county supervisor in Juniata County.

A graduate of Greenwood High School, he and his wife, Jennifer, live near Millerstown.

**Butler Four-Auger Mixers**

FORT ATKINSON, Wisc. — Designed to meet the heavy demands of commercial operations, Butler Livestock Systems' new Four-Auger Ensilimixers feature heavy-duty Tuff-Glide liners on the mixing chamber and conveyor — and optional Tuff-Glide bottom liners. In addition, the front auger bearings are made with Tuff-Glide sleeves.

The major advantage of Tuff-Glide is that it is not affected by acid or moisture, and resists abrasion. As a result, the Tuff-Glide sides and bottom may never have to be replaced. Also, because this low friction material is self-lubricating, it greatly improves mixing efficiency and capacity while reducing horsepower requirements.

Tuff-Glide makes the sleeve-style front auger bearings unique since they require no grease and

are corrosion-resistant. And Tuff-Glide extends the life of the conveyor by preventing rust and wear.

The bolted construction of the mixers means that welding and patching are no longer necessary if a part is damaged or wears out. The new section can simply be bolted in. This feature extends the life of the units and can add to their trade-in value.

Model 345 has a mixing capacity of 335 cu. ft., Model 402 has a capacity of 392 cu. ft., and Model 460 has a mixing capacity of 450 cu. ft. A choice of truck-mounted, trailer-mounted or stationary equipment is available for each model.

For more information on the new line of Butler Four-Auger Ensilimixers, contact your local Butler dealer or write to Butler Livestock Systems, 801 Janesville Avenue, Fort Atkinson, WI 53538. Telephone: (414) 563-5521.

Butler's Tuff-Glide mixer liners are resistant to acid, moisture and abrasion.

**DeKalb Honors Smiling Porker Farms**

HATFIELD — Smiling Porker Farms, a subsidiary of Hatfield Packing Co., was recently named Farm of the Year in DeKalb Swine Breeders' service program.

Located in Whitesville, New York, and managed by Bob Bortz, Smiling Porker achieved first place in DeKalb's nationwide service program which represents over 30,000 sows. "I must give a lot of credit to my assistant managers, Alan Wright and Jim Folts, for this achievement," said Bortz.

Smiling Porker Farms began in 1983 with 500 sows utilizing DeKalb's Specific Cross Breeding Program in the farrow-to-finish unit. "We started our own operation to help us better understand swine production and to help service our customers," said Doug Clemens, hog procurement supervisor for Hatfield Packing.

Jerry Clemens, senior procurement supervisor for Hatfield states, "We are very pleased with the level of production we see from our operation and are very impressed with the carcass quality we receive from the DeKalb market hog."

Celebrating Smiling Porker Farms' Farm of the Year award are (left) DeKalb National Service Manager Jimmy Ramsey, Smiling Porker secretary/treasurer Ken Jones, Bob Bortz, Alan Wright, Jerry Clemens, Butch Clemens, Hatfield president John Clemens, John Folts and Doug Clemens.

"It's teamwork that counts," said Butch Clemens, executive vice president of Hatfield, who praised the management of Bortz, Folts, Wright, and DeKalb's management program.

Hatfield Packing Company was founded by John C. Clemens in 1895

in Mainland, Pennsylvania, marketing its pork products in Philadelphia. Today, Hatfield Packing Company, located in Hatfield, markets quality pork products in a 150-mile radius, employs 750 people, and slaughters 3,700 hogs per day.

**Deutz-Allis Loader Handles Round Bales**

MILWAUKEE, Wisc. — A new 465 loader joined the Deutz-Allis loader line designed for the 6200 series tractors. The model 465 detachable loader is engineered specifically for the 6265 and 6275 tractors — both two- and four-wheel-drive models.

A special feature on the 72 and 80-inch 465 loader buckets is an optional grapple fork which easily and safely handles 48-inch and larger round bales, loose hay or packed silage.

"The model 465 loaders feature rugged construction for years of material handling, a "Quick-On" system for easy hookup and detachment, increased bucket rollback for effective loading of soft material and an easy-to-reach "Joystick" lever for smooth, effortless operation," says Lew Swoverland, implement product manager.

Designed for hefty loads, the 465 loader lifts 3,200 pounds at a full-height of more than 11 feet. Reach at that height equals an outstanding 44 inches. At three feet, the loader carries up to 3,750 pounds with a powerful 4,200-pound breakaway force.

The loader offers a choice of 60, 72 and 80-inch material buckets, featuring a fully-rolled, high-strength steel shell for easier

loading and more positive cleanout when dumped. Manure buckets are also available in either 60 or 72-inch sizes and come with removable dirt plates to increase bucket capacity.

**Monitoring System Warns of Problems**

MEDIA — The Sensaphone Monitoring System, will watch brooder, broiler, egg and turkey houses, also hatcheries, processing plants, storage facilities, or any other untended property 24 hours a day.

It will warn you of environmental changes and alarm conditions so you can avoid or minimize losses and damage to vulnerable chicks, hens, broilers, ducks, turkeys or other poultry and processed products.

The system will sound an alert and call you by phone and report the alert condition in English if anything goes wrong. You can also call-in from any phone, at anytime, to check on operating conditions when you're not there.

With a Sensaphone Monitoring System, you can keep track of the condition of your automatic feeding and watering units, ventilation, air movement and rising house temperatures, especially during summer heat waves, or falling temperatures in sudden cold snaps. It even allows you to listen-in on noises in the buildings to hear if your flocks and operating equipment are OK.

The unit's solid state

The Sensaphone System can monitor up to six environmental and security conditions, automatically informing the owner by phone in event of alert.

microprocessor can monitor simultaneously up to six environmental and security conditions and is readily compatible with an extensive range of sensors

and alarms. For more product information, contact Art Silverman at 215-565-8520, Phonetics, Inc., 101 State Road, Media, PA 19063.
