# NEW CHORE-TIME COW FEEDING SYSTEM

Increase milk production while saving labor, feed

## Put Chore-Time Cow Feeding System To Work Boosting Your Income

Feeding supplement by hand wastes money two ways:

- (1.) Some cows get too much, others not enough - wasting feed and hurting production.
- (2.) It's time and labor spent you'd be money ahead to put into management. Mechanize your feeding with an inexpensive, energy-efficient Chore-Time Cow Feeding System. Feed each cow the right amount, as many times a day (to boost production) as you want by automatic timeclock, or by pulling a lever.

Find out about the Chore-Time system - our 10-year warranty on auger - plus the line of feed bins that outshell all others in America because of their built-in quality and long life.

Drop Feeder is made of durable, rustproof polyethylene plastic for feeding either dry ground rations or for use in high moisture corn systems.

Simple ball valve in feeder means long, trouble-free service.

TWO TYPES OF FEED DELIVERY SYSTEMS (FLEX-AUGER or MULTIFLEX) AVAILABLE WITH THE NEW CHORE-TIME COW FEEDING SYSTEM

Ideal For Straighter Runs, Larger Capacities

Highly energy-efficient, extremely long wearing and trouble-free - that's how FLEX-AUGER systems are known the world over.

For most livestock and poultry feeding installations, plus for moving high or low moisture grain FLEX-AUGER is the ideal choice.

For Lots Of Turns, Sharper Corners, Greater Lengths

MULTIFLEX is a new innovation using the same high tensile strength steel auger as on our famous FLEX-AUGER. But, instead of rotating the auger, a MULTIFLEX system propels it within the tube. This sliding of the steel auger means there can be more corners and sharper corners in a system.

There's an added bonus in energy savings: while FLEX-AUGER beats the competition in energy-efficiency, our new MULTIFLEX saves even more energy.

Discuss your particular needs with us to make the best choice of systems for your kind of animals and building layout.
