

DON'T LET YOUR COWS KEEP ANY SECRETS FROM YOU.

Because it could cost you money. A lot of money.
Now for the first time you can find out fast if your cows are in calf or need to be bred again.

Calfcheck REPROSTRIP A breeding breakthrough

Calfcheck will tell you the breeding status of your cows only 21 days after they have been bred.

Calfcheck is a simple ten minute test that you can do on the farm with a milk sample from each cow that you need to know about.

Calfcheck will help you get a bigger calf crop, make better decisions on culling, make more efficient use of bulls or artificial insemination and improve your herd calving interval. The overall result will be more milk and bigger profits.

So don't let your cows keep their secrets a day longer.

Find out about the **Calfcheck** now. Available in kits of 24 or 64 tests.
