ROLLER CHAIN American Made

\$2.50 per foot #60

Replace worn chain before you start planting. Avoid frustration and lost time caused by chain breakage.

PLATFORM AUGER FINGERS

PART NO. AH107066 \$3.40

PART NO H102724

John Deere field tested fingers and bearings are surface hardened for shock resistance and long wear.

SQUARER BALES

John Deere's baler line builds squarer, stackable bales

To build solid, square-cornered bales consistently, you need consistent control of the hay. And John Deere's 327, 337 and 347 Balers give that control from the moment hay touches the pickup.

A wide pickup with extra teeth lets these balers take in all the hay in today's wider windrows. There's even a compressor to keep the hay under control.

A floating tapered auger and adjustable feeder forks take over to keep material flowing evenly. The gear-driven knottor puts the finishing touch on these solid, stackable bales from John Deere.

New Balers In Stock For Immediate Delivery

EASY ADJUSTMENTS

John Deere 1219 Mo/Co features simple adjustments for easy servicing

Different hay crops have varying conditioning requirements. That's why John Deere's 1219 Mower/Conditioner gives you the option of changing roll spacing and pressure in just a few minutes.

When crop conditions call for it, simply change the roll spacing to as wide or as narrow as you want. When more or less pressure is needed, just turn the adjusting bolt.

Easy to adjust windrow forming shields let you build the type of windrow you want. See the 9 foot 1219 Mo/Co that adapts to your haying conditions.
