

NY Cattlemen Vote to Include Dairy Steers in Direct Marketing Program

SYRACUSE, N.Y. — Producer response to the New York Beef Cattlemen's Association Direct Marketing program has been very good, Lee Kraszewski of Corning, direct marketing coordinator told the Council of the Cattlemen's Association at the June meeting in

Syracuse. The Council at this meeting voted to open the Direct Marketing program to all cattle, including dairy feeder cattle. Kraszewski reported on response to the mailing of the Empire State Beef Development

Brochure which contained a mail-back post card to indicate producer interest. An almost 10 percent response to the mailing has been received in the first five days. Producers are encouraged to respond to the brochure which outlines a three phase approach to improvement of beef cattle. These include the State Department of Ag and Market's performance testing program, Cornell University's Extension livestock beef management program, and the New York Beef Cattlemen's Association direct marketing program. The latter is being funded in part during this the first year of development and implementation by a grant from the Department of Ag and Markets...

Cattlemen's Association president Peter Nixon of Westfield told the Council during the discussion about including dairy steers, "our goal with this direct marketing program is to get the best price possible for producers of beef." He explained the inclusion of dairy cattle in the Cattlemen's

Association direct marketing and heifers, on their farms. program will not only make a market available but could encourage producers who have gone out of dairy farming to feed out participating in the fall direct cattle, both dairy and beef steers marketing sales.

New Simmental Programs Available

BOZEMAN, Mont. — The American Simmental Association is offering two new services geared to assist breeders in planning their breeding programs.

One service, entitled "Sire Search," is designed to aid breeders in their quest for potential sires that can help meet their own herd improvement goals. Breeders may designate the criteria they want to see exhibited in a bull. For example, they can select one or more of the seven production traits along with other criteria such as age, polled or horned status, country of origin, or even the bull's sire. The breeder may also specify that the bulls he is seeking must meet minimum

levels of performance.

After the bulls have been selected, the breeder can move on to the second phase of the new program, the "Planned Mating Service". ASA will utilize the previously selected sires to calculate Expected Progeny Differences (EPD's) for prospective calves that would result from the mating to the owners own cows. The process is the same as that currently used by ASA in processing calf crop summaries.

For more information contact American Simmental Association, 1 Simmental Way, Bozeman, Mont., 59715, Phone: 405-587-4531.
