

## Ag Master Offers Freeze-Dried Forage Inoculants

MADISON — Baled hay is now included among the forage crops that can be effectively preserved with AgMaster inoculants from Marsch's Agri-Products, Miles Laboratories, Inc.

AgMaster inoculants offer many cost-saving advantages to farmers who produce their own forage crop feeds. Farm and university trials show that these natural bacterial inoculants inhibit the growth of spoilage-causing molds and yeasts, enhance palatability and

increase dry matter intake by an average of 12 percent per animal. Valuable protein and total digestible nutrient (TDN) levels are maintained because AgMaster inoculants help control the fermentation process and reduce heat damage.

Field trials indicate that baled hay can be harvested at up to 25 percent moisture, which enables farmers to maximize their overall harvest efficiency by cutting conditioning time and extending their baling hours.

Leaf shattering and crop field losses are minimized, which helps save supplemental feed costs. Heat damage is reduced because AgMaster inoculants rapidly lower the pH level during the crop fermentation or drying state.

Miles Laboratories, Inc., was the first company to introduce the concept of crop-specific inoculants with its 1982 introduction of AgMaster Alfalfa Inoculant. Since then, the firm has developed the marketed natural inoculants specifically formulated for all

other forage crops, including corn silage, high moisture ground ear and shelled corn, and now baled hay.

AgMaster inoculants are still the only inoculants that are freeze-dried, shipped frozen to farmer customers, and applied in liquid form to forage crops. This unique manufacturing/shipping/application system ensures that the inoculant bacteria retain maximum activity.

Each easy-to-store, 120-gram moisture-proof packet of

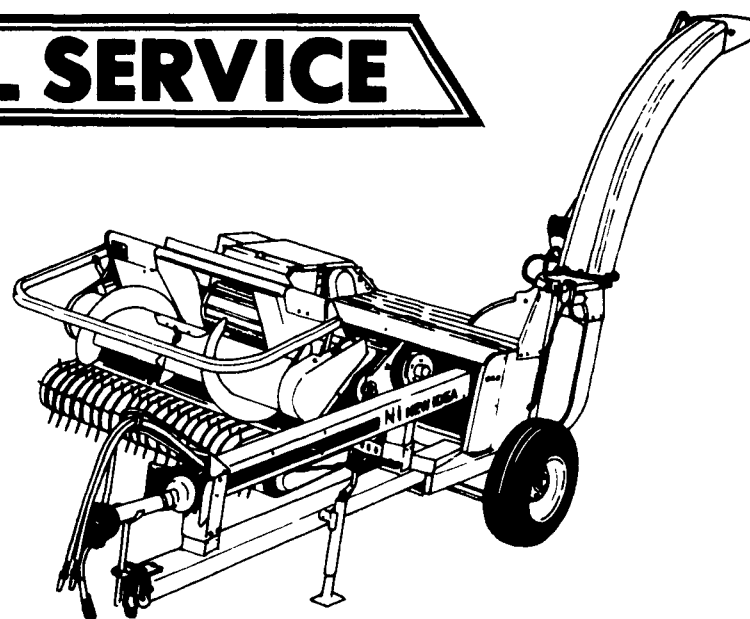

AgMaster inoculant contains over four trillion active bacteria—enough to treat 25 tons of silage or 12½ tons of baled hay.

For more information on AgMaster's full line of crop-specific inoculants, the nearest authorized AgMaster dealer, or information on becoming an AgMaster distributor in selected areas, contact AgMaster department, Miles Laboratories, Inc., P.O. Box 592, Madison, WI 53701. Telephone 1 800 362-3932 (in Wisconsin) or 1 800 525-9636 (outside Wisconsin).

## FULL LINE..FULL SERVICE

### We're here to help...

From first cutting until the silo is full and the last bale is put up, we're here to meet your hay and forage equipment needs with top quality New Idea machinery and superior service and parts.

- **Mower Conditioners:** 7 and 9 foot models plus 12 and 14 foot Hydra-Steer models
- **Cut/Ditioners:** 7 or 9 foot models, great for down hay. Plus, shreds and windrows corn stalks for baling
- **Mowers:** 7 and 9 foot mounted or trailing models.
- **Rakes:** Rake/tedder with hydraulic drive plus 3 ground drive models
- **Round Balers:** 900 or 1800 pound bale models, easy to operate
- **Rectangular Balers:** Three high-capacity models; bale thrower available
- **Forage Harvesters:** Two models - 2 or 3 row capacity and 72 or 90-inch hay pickup
- **Disc Mowers:** Three models for high capacity mowing, easy maintenance

**NEW IDEA**

FULL LINE, FULL SERVICE. See us soon for all your hay and forage equipment needs.
