"CLEAN FLOW"
Aluminum Bodies

by OMAHA STANDARD

Backed by more than 60 years' experience in truck body manufacturing, this is the aluminum body that sets the standard for the industry. With 92 3/4 inches of unobstructed inside width, this rugged, lightweight body lets you haul more grain or bagged or palletized commodities and save fuel doing it.

With 60" or 72" high, vertically corrugated, splice-free sidewalls, three-piece full opening rear doors, swing-out header, trailer-type aluminum flooring and "I" beam cross members, this body's built for rugged field work and continuous road hauling.

"Clean Flow" design of the extra deep 30° sidewall corrugations allows complete emptying with no sharp corners for grain to hang up.
