

Energy Saving Tips

Summer has arrived and along with the high temperatures associated with this time of year, summer also brings with it high electrical bills. Plan now to reduce your electrical use this summer.

Start by taking a thorough look at the lighting in your home. These energy saving tips will increase your lighting efficiency and help to make energy bills more manageable.

Turn Off Lights When Not Needed

Young children and teenagers are most negligent in this area, so discuss with them the importance of this practice.

Use Task Lighting
Whenever possible, use a floor or table lamp rather than ceiling lights and install lights above work benches or sinks.

Downsize Bulbs
Replace present bulbs with the next lower watt size. You may find that by replacing 100 and 75 watt bulbs with 75 and 60 watt ones, respectively, sufficient light will still remain and energy use will decrease.

Use Fluorescent Bulbs
A 25 watt fluorescent bulb gives off as much light as a 100 watt incandescent bulb, but costs one-fourth as much to operate.

Further information may be obtained by calling the toll-free Energy Hotline at 1-800-282-8616.
