Mounted on EZ Trail  
 10 Ton Gear w/11Lx15 Tires

**COMPLETE UNIT ..... \$5,390**

### REAP THE BENEFITS

Yield Trak Monitors four basic functions ground speed, acres harvested, bushels per acre and total bushels harvested. The bushels per acre function is divided into two counters with independent resets, so you can pinpoint yields with each tank-full or measure an entire field.

Yield Trak provides the information you need at harvest to operate at maximum efficiency and make the best possible decisions for next season's crop.

- Record exact number of acres harvested
- Increase productivity through accurate monitoring of ground speed
- Establish yield records for each field or soil type
- Assess the effects of weeds or insects on yields
- Determine next year's fertilizer and chemical requirements
- Measure yields from test plots to determine best performing varieties
- Establish a more accurate grain inventory
- Load trucks within legal limits

Yield Trak can be used with any make or model of combine and calibrated to accurately measure corn, soybeans, wheat and other small grains. Whether you run your own farm or do custom combining, efficient operation is more essential than ever. Yield Trak eliminates the guess work that can cost you time and money.

*Low Cost - Easy-to-Use*  
*Accurate yield measurement with each tank unloaded.*

**BLADE, SCARIFIER BOX BLADE**  
 A pull of the trip lever locates the desired position.

MODELS ROB48 ROB54 ROB66 ROB72 ROB84

*Roll Over Box Blade with optional Hydraulic Trip Lever Kit for larger tractors or tractors with cabs.*

### FEATURES

- 2 piece construction
- Convenient locking rod for shanks
- Shanks preset to 30° entry position
- High carbon steel reversible cutting edges
- Heavy duty "A" frame
- Greasable bearings

The Roll-Over Box Blade will drag a load or level a work site to grade.

To rip, rotate the Roll-Over to the scarifying position. Rigid shanks offer penetration in hard or compacted soil with minimal drag.

Simply trip the lever and reverse the blade for backfilling.
