**ECONOMICAL PROTEIN COSTS**  
**FOR YOUR CORN SILAGE**  
 with LSA® (Liquid Silage Additive)

Protein costs can vary. Eliminate this problem by using LSA.

Corn Silage typically checks 8% crude protein on a dry matter basis. By adding LSA, you can accurately and very economically raise the protein level to 13%.

Adding LSA is as easy as flipping a switch or turning a valve. It's also non-corrosive.

Get your feed costs under control, improve the quality of your feeding program, and eliminate cost variables with LSA.

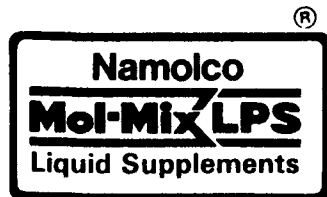

**Here's What LSA Users Have To Say:**

"I rate LSA superior to other additives and preservatives because you get nutritional benefits in addition to preservation."

"We used LSA the first year to economically increase the protein level and the second year we used it because it worked out real well for heifers outside. We didn't have to give them any protein or grain with the treated corn silage."

"Our production while feeding LSA 100 treated corn silage has stayed constant as if we were feeding all natural protein sources. Currently the herd average is about 18,000 pounds milk with 4.1% test with 742 pounds butterfat on 100 registered holsteins."

For a silo with increased protein and more nutritious corn silage, please contact -
