HOW TO MILK A KUBOTA.

A Kubota tractor can do a whole herd of chores on a dairy farm.

Out in the hayfield, it can plow, till, mow and bale. Apply fertilizer or pesticide. Help repair an old fence.

Back in the barnyard, it can haul feed from the silo to the trough at mealtime. Then clean out the corrals.

In fact, it can do almost everything except milk the cows. Because it's loaded with hardworking features.

Some come standard. A

liquid-cooled diesel engine. A bevel gear system on every 4WD tractor. Plus a neatly designed operator platform.

Or choose a model with more advanced features. For example, a 5-cylinder direct injection diesel engine. It's fuel-efficient. It runs more smoothly than a 4-cylinder engine. And more quietly. That can help reduce both operator fatigue and noise-related stress on the cows.

Of course, any Kubota

tractor works hardest with implements also designed and built by Kubota. The quick-attach front loader on the L4150DT you see here is a perfect example.

A Kubota dealer can show you all of our tractors. You have more than 15 different choices from 23.5 hp to 85 PTO hp. One should be just about custom-made for your needs.

So start imagining all the chores a Kubota could do around your place. There's really only one thing it won't do. Head for the barn before the work is done.

Nothing like it on earth.
