You can't afford to plant second best

■ Don't be misled by cheap seed treatments that only provide limited disease protection. The systemic activity of Vitavax® -200 protects your wheat and barley against disease losses from true loose smut, common bunt, scab seedling blight, seed rots and seedling diseases.

■ Vitavax is patented as a growth stimulant. Under field stress conditions, like drought or cool, wet weather, Vitavax-200 treated plants normally emerge faster, develop more extensive root systems and larger crowns, and produce healthier stands that contribute to higher yields.

Vitavax gets to the heart of the problem. ♥ It gets to the heart of the seed.
