

## Enter the 21st Century—with a fiberglass bulk storage bin from **Fiberdome®**

- Eliminates bridging, won't rust or corrode
- Cuts heat buildup and condensation
- Feed stays fresh in any weather
- Precision engineered for long, long life
- Unique 5-year warranty
- Adaptable to any augering system

**See Us At Penn State's AG PROGRESS DAYS, Aug. 19-20-21, Located On West 3rd Street**

## THE COW SAVER

One of the largest killers of dairy cows in the United States is metal they've ingested. That's why Fiberdome developed The Cow Saver... a magnetic system that catches metal and hardware before it gets to your cows. Even if you don't actually lose the cow, evidence shows that when foreign objects are eaten by dairy animals there's a large reduction in milk production -- and who can afford that!

### Saves your cows from dangerous hardware!

You'll be amazed at the job it will do! Saving just one cow or avoiding costly veterinary bills will more than pay for The Cow Saver.

The Cow Saver can be incorporated into almost any feed handling system.

And The Cow Saver is built tough to provide you with years of dependable service.

### MADE TO LAST WITH FIBERGLASS from FIBERDOME

Fiberglass is practically dentproof. Stands up to long periods of hard use • Contents stay fresh because fiberglass absorbs little or no heat • Because there is very little condensation on the inside, moisture cannot alter the contents of material being stored • Fiberglass is rust resistant. Acids and salts can't hurt it. Economical to Use • Simple to Install • Easy to Operate • Eliminates Dirty Chutes • Directs Flow of Feed • Saves Wear on Silo Chutes • Adapts to Any Make Silo. The only all-fiberglass feed cart • Buff exterior, white gel-coat interior • 14 bushel capacity (4.93 Hectoliter) • Immune to silage acids, does not rust • Easy to load, unload and sanitize. Insulation value provides warmth in winter while remaining cool in summer.

### SAVE TIME SAVE MONEY OPERATE A MORE EFFICIENT SILO WITH... FIBER FUNNEL

**VERSATILE**  
Fiber-Funnel is adaptable to any conventional silo chute (steel, fiberglass or concrete) Fiber-Funnel is easily removed from the base connector to allow access to the silo chute for servicing.

**DURABLE**  
Fiber-Funnel's fiberglass construction is strong, lightweight and totally non-corrosive. No rust — no rot — no moving parts to wear out or seize

**EFFICIENT**  
The patented Fiber-Funnel system is available in two discharge angles (20° and 40°) to accommodate any silo requirement, and can be adjusted to any length by simply cutting the optional 9" extension pipe. The unique design of the Fiber-Funnel stops silo chute updrafts. Fiber-Funnel is easily mounted with simple tools and an electric drill or have your local dealer arrange the installation

### Fiberdome SILO CHUTE

made with fiberglass, the material of the future - and proven in the past -

The Fiberdome chute is designed and engineered to be installed on most types of silos. Its structure allows it to withstand the toughest beating the weather elements or silo unloading systems can possibly dish out.

The chute is constructed in full 7½' sections to minimize the number of joints. Connecting joints have a 2½" tongue and groove design to keep feed in and water out. The large ribbed construction adds stability and strength.

Fiberglass is durable, corrosion-proof, attractive and translucent, allowing sunlight to pass through. Sunlight quickly dries interior moisture in the chute. The hard gleaming gelcote surface will remain for many years.

### How can you raise healthier calves?

### Fiberdome

### CALFhutches are your answer

Raising calves is a tricky business. That's why modern calf raisers are going to individual hutches ...to help save more calves by cutting down on pneumonia, scours and hoof problems. Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns.

You can be assured of this kind of healthier environment with Fiberdome CALFhutches. Their unique one-piece construction of heavy gauge fiber glass makes them weather-proof, so they will last indefinitely with normal care. No joints for moisture and bacteria to creep through. A white gel-coat finish keeps them cool in summer.

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage.
