recommendations.

Sire Selection

(Continued from Page F4)

County, Dennis Bricker works quietly with his young family and their herd of about 40 Holstein cows. In this setting, good temperment and cows that are easy to work with are important. Dennis watches for these traits himself.

When it comes to improving conformation of his cows, this member appreciates skilled professional help. "I went to Linear-Mate because I was shooting in the dark," he explains. "Atlantic now offers many more bulls and they know what they'll do."

So far, he sees improved udders and steady increases in production. The DHIA average is up to 19.100M and is quite uniform throughout the herd, with only five cows currently projected over 20,000M.

Future herd goals are higher test with more milk, and stress on good legs and feet and udders. Bricker and his Atlantic Unit 32 Technician, Walter Mills, rely heavily on the convenient computer printout of Linear-Mate recommendations. The latest list for his herd suggests Starwar, Forcaster, Stewart, Bachelor, Troy, Steady, and Lannie most often.

Dennis has not set a price range for his genetics. "A couple dollars more to pick the right sire is worthwhile," he says. He has faith in Atlantic's sire-proving program that produces bulls with high repeatability, and is working to take full advantage of the strong genetics available. He follows the six-month updating program for his dry cows and heifers, and says its important to have the latest sire summary lineup in his sire recommendations.

Clifford Hawbaker

"Linear-Mate is as important to breeding better cattle as breeding itself." states Clifford Hawbaker, Franklin County dairyman with 170 Holsteins in loose housing. He's used Linear-Mate for three years and his heifers now calving resulted from following the first recommendations in his herd. He is very pleased to see better production by these young cattle, with fewer culls.

"When you're a direct-herd breeder like I am, the bull selection is up to you," he explains. "It's hard to keep up with all the sire information and know how to use the bulls. It gives me satisfaction to have another objective opinion on my cows."

Cliff says that before his herd was Linear-Mated, his breeding program was guesswork on what bulls to buy and how to use them.

Fund Enriches PSU College

YORK, Pa. - The Gerald and Leoda Gummo Excellence Fund in Agriculture has been established at Penn State to enrich the College of Agriculture, the University's Board of Trustees was told recently in a meeting at the University's York Campus.

creasing semen prices. But it's still

most important to breed each cow

Scholarship recipients will be selected by the College of Agriculture Scholarship Committee. Consideration will be given to full-time undergraduate and graduate students enrolled or planning to enroll in the college. Candidates must possess superior academic records and must prove financial need.

Scholarships will be awarded for one year and may be renewed if the recipient continues to be eligible.

ANNUAL PERCENTAGE RATE FINANCING Ford compact tractors. At this rate, they may be the best buy going.

Compact tractors don't come any better than the 13 to 38-horsepower* Ford 1000 Series diesels. And now these high-quality units are an even better value.

Choose from seven models, all available with two or four-wheel drive: Ford 1110, 1210, 1310, 1510, 1710, 1910 and 2110.

Buy and take delivery between July 14 and November 30, 1986. We'll help qualified buyers arrange low 534% financing for up to four years through Ford Credit.

Save 50% on 3-year Extended Service Protection.

During this special sale period, you may also purchase Ford Extended Service Plan protection for three years or 2,500 operating hours, whichever comes first...for only half of the regular cost.
