CHORE-TIME BINS

We Will Assemble And Deliver Bins To Your Farm!

The feed bin is the very heart of any feeding system. If the bin lets you down, the system quits.

That's why we put so many quality features into our complete line of feed bins - which includes 6-foot diameter steel or polyethylene (great for H.M. corn), 7-foot, 9-foot, and 12-foot models. All are available in several capacities - so you have a wide selection of bins to fit your needs.

Here are just a few of the quality features that make our bins such an outstanding buy:

- Sturdy Ladder System
- All Bin Seams Are Double Caulked
- Choice of 16 or 25 Inch Hopper Opening
- All Galvanized Steel Parts

A Beautiful, maintenance-free fence designed for safety

BEAUTY - can transform your farm into a showplace.
SAFETY - no sharp edges, "elastic action" rails, won't split and shatter like wood, protects your animals.
MAINTENANCE-FREE - never paint or treat fence again!
DURABLE - impact resistant, long worry-free service.
SELF-CLEANING - Hi-Polymer compound cleans itself.
NON-TOXIC - National Sanitation Federation approved.

Get full information about TRIPLE-CROWN™ tubular Hi-Polymer fence now. Just call or inquire today.

DROP FEEDING SYSTEM

Chore-Time's Drop Feeder is designed for feeding individual cows or sows - and used in groups can feed an entire pen of hogs.

Drop Feeders are made of durable, rustproof polyethylene plastic for feeding either dry ground rations or for use in H.M. corn systems.

They fit on our MULTIFLEX tube as well as on various FLEX-AUGER tube sizes.

FANS

Panel (PF) Fan

Is a good all-around model. New 36-inch diameter fan is single speed, available with highly energy-efficient motor. Ideal for most broiler houses. Mounts in side-wall or suspends inside building for special air flow applications. 36PF features compound curve blade, galvanized metal front panel. Available with sturdy waferboard wood framework and safety screens.

Panel Fan

RLX Fan

is the fan to choose where long fan life is desired. Tough, dense RLX housing is made of multi-layer, laminated material (same as truck fenders and canoes are made of). Can't corrode. Won't splinter like fiberglass, even in sub-zero weather. Streamlined, gently contoured housing has no dirt-collecting corners that can produce energy-wasting eddy currents. Fan also features die-cast aluminum blade, patented one-piece no-draft fan door, stainless steel motor mounts, and variable speed motor. Offered in 14, 18, and 24-in. diameters.

RLX Fan

FLEX AUGER

Ideal For Straighter Runs, Larger Capacities

Highly energy-efficient, extremely long wearing and trouble-free - that's how FLEX-AUGER systems are known the world over.

For most livestock and poultry feeding installations, plus for moving high or low moisture grain,

FLEX-AUGER is the ideal choice. The high tensile strength spring-like steel auger of FLEX-AUGER rotates in a specially-compounded ultra-violet and wear resistant PVC tube. PVC is much quieter running than steel tubing.
