

Those extra bushels make a big difference...

You can get extra bushels from your soybean acres when you plant Pioneer® brand soybean seed. And, those extra bushels will make a big difference when you market your beans.

The Pioneer difference starts with the seed.

From breeding to bagging, Pioneer brand soybean seed is selected, tested and handled with care. You get pure genetic quality and yield potential from the beans in the Pioneer bag. That's why Pioneer soybean seed varieties consistently make a difference — extra bushels from every acre you plant.

Ask your Pioneer representative about Pioneer® brand soybean seed — it can make a big difference for you.

THE DIFFERENCE
Pioneer® brand soybean seed

9271

This new late Group II variety has become a leader almost overnight. You'll find the extra yield potential displayed by 9271 can really make a difference in your operation. 9271 matures one or two days later than 2480 and consistently outyields the competition by one or two bushels per acre. 9271's excellent emergence, lodging resistance, Phytophthora Root Rot tolerance and very good shatter resistance give you the extra performance it takes to make a good soybean crop a great soybean crop.

3981

Your bin is bound to be a little fuller next fall when you plant 3981 this spring. Over the last three years, 3981 has outyielded all competitive varieties in this area by an average of 2.6 bushels per acre in 139 comparisons. What's more, this late-Group III variety performs well in all row spacings, has excellent standability and shatter resistance, very good emergence, and excellent field tolerance to Phytophthora Root Rot along with good resistance to Bacterial Pustule.

9441

Here's a variety that's proven itself to be different from the others. On 56 on-farm comparisons in this area, 9441 outyielded the strongest by an average of 1.4 bushels per acre. And with strong emergence, excellent field tolerance to Phytophthora Root Rot, resistance to shattering and very good standability, 9441 not only makes a difference in yield, it also performs better in the field. See for yourself. Plant 9441.
