Patz Offers New Belt Conveyors/Feeders

POUND, Wisc. - The new Patz other conveyors, feeders or feed Model 8616C and Model 8616E Belt Conveyors/Feeders convey and feed with one machine, depending on options selected.

Central hoppers allow adding feed virtually anywhere plus conveying in either direction. Optional plowoffs deliver feed to

either side of the feeder.

carts.

The 16-inch concave belt conveys up to 62 cubic feet (or up to 2,000 pounds) of feed per minute. Select a smooth belt for horizontal conveying and slight inclines. Select a textured belt for inclines up to 30 degrees.

Feed up to six lots different rations, including delivery on either side of the feeder. A solidstate, instant-reverse motor

powers the plow for greater reliability. Simple wiring in control panel also increases reliability

An optional adjustable elbow allows for conveying up an incline and then level. The choice of end drive or central drive increases layout flexibility. Feeders mount down the center or on the side of feed bunks, or can be ceiling mounted.

The central-drive conveyor/feeder is available in lengths to 200 feet. The end-drive machine extends to 100 feet.

These new Patz conveyors feed up to six lots and deliver on

Hay Loaded

HINSDALE, IL. - Hay is loaded into a semi-truck for shipment to Bishopville, SC. The hay, donated by J I Case, manufacturer of Case IH agricultural equipment, was grown on land surrounding the company's Test Center in Hinsdale. The company-owned truck will take the hay to Interstate Tractor Company, the Case IH dealer in Bishopville, for distribution to farmers who have been affected by severe drought conditions. The hay lift is the third such effort supported by Case IH during the summer months. Hay from Joy, IL, near the Quad Cities, was shipped to farmers in North Carolina, and hay from Walworth County, WI, was shipped to farmers in the Montgomery, AL, area.

Used carbon steel storage tanks which we have removed the end (heads). Lifting lugs attached. No coating. These tank shells make an inexpensive, quick and strong bridge. Tank shells buried with 3 feet of ground cover can support 80,000 lbs.
