The One Spreader For A Two-Spreader Farm

Manure from confinement housing can be quickly and easily loaded and delivered to your spreader with a versatile Gehl skid loader. The heaviest loads are no problem with a 300 Series manure spreader. It's built with heavy duty chain drive and rugged construction throughout. Your first glance will tell you the 300 is unlike any spreader you've ever seen.

Handles All Kinds Of Manure-Liquid, Semi-Solid, Pon Packod, Even Frozen

The big difference: a square auger. The heavy-duty square-tube auger simply works better than conventional round augers. That's because its patented configuration sets up a unique "pulse action" to thoroughly break up and blend manure and lessen the chance of wrapping. The auger's paddles - specially formed for added strength against tough, packed loads - are set at the precise pitch to maintain the proper flow of manure to the discharge expeller.

GEHL self-unloading boxes

THE HIGHEST QUALITY AT THE BEST PRICE

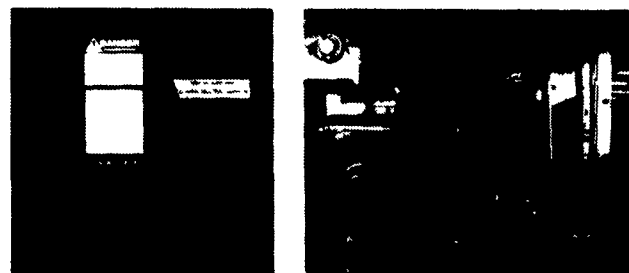

The Gehl tradition of building the best forage boxes is well known. Gehl forage boxes traditionally maintain a high resale value. The Model 970 continues the tradition with added features that increase unloading speed, capacity, strength and ease of maintenance.

The first thing you'll notice about the 970 is the steel sides. They're made from 20 gauge GEHLSTEEL. GEHLSTEEL is superior to hot-dipped galvanized, Galvalume™, electrolytic galvanized and aluminized steels.

It has far better corrosion resistance and a longer life expectancy. Even if scratched, there is little chance that rust will appear.

Available in 14-, 16- and 18-foot lengths, the 970 is backed by a 10-year warranty on the sides, endgate, stakes and platform.

Study the Model 970 and see all the features that make it the best performing forage box on the market. Then study the new low price. You'll agree that the Gehl 970 is the best forage box value available today.

10-Year Warranty
On sides, endgate, stakes,
platform and roof

All new drive system. The two-speed drive system features #50 roller chain for added strength and durability. The apron chain speed is easily controlled by the handy lever located on the front of the box.

A TRENCHING MACHINE YOU CAN REALLY ENJOY!
