

The 435 Conservation Chisel Plow... A MORE VALUABLE DISK CHISEL

All disk chisels can save topsoil. But White Farm's 435 Conservation Chisel Plow also saves time and money.

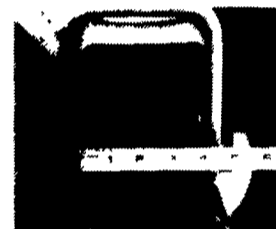

Versatile concave disks up-front. Individually mounted 22 inch blades are hydraulically controlled to let you determine the amount of residue that remains on the surface. Disks can be raised completely out of the ground for maximum conservation, or lowered for maximum tillage.

Big 4"x6" frames. Our steel box beams have 25 percent more weld area at every joint than competitors' 4"x4" beams.

Chisel shanks every twelve inches. Three ranks of chisels spaced twelve inches apart on a long 90 inch frame help maintain uniform tillage and prevent residue build up. The 2"x29" spring-loaded chisels raise up and over obstacles-up to 11 inches.

Come in and experience for yourself the quality and value built into every 435 Conservation Chisel Plow.

Over 100 years of experience has helped White Farm design what we believe is the most versatile, durable conservation chisel plow today.

Large 4"x6"x1/4" steel box beams and strength, rigidity and built-in working weight to the 435

Walking beam axles help maintain more uniform working depth. Note the long distance between wheel hubs

Individually mounted 22-inch spherical discs rotate on anti-friction bearings

Heavy-duty high trip clamp assembly allows chisels to raise 11 inches to clear obstructions
