The satisfaction that comes from doing a good job of farming

Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher you can expect to harvest as much as 5 more bushels of corn per acre, with similar increases for all other forage and cash crops.

# Control

## it's in your hands

... control of your crop - control of the price you receive for that crop - control all the way from harvest to market - when you have your own, on-the-farm grain drying and storage equipment. Now is the time - your mfs dealer is the place - he can tell you all the advantages of on-the-farm drying and storage equipment and the many reasons why mfs "Stor-age" is the equipment for you. Get control - keep control - with the "world's most wanted grain bin" - mfs "Stor-age".
