"I Had An Embarrassing Problem."

"It was something I didn't even want to talk about. But now that the problem is solved, I'll tell you. It was a terrible case of raw, cracked teats and udder. You can imagine how that made me feel, especially since I had been number one in the herd. I was miserable!

"Then the dairyman—bless his heart—treated me with Udder Butter™. You know, the easy-spreading, long-lasting unguent from the folks at Corona. Soon my teats and udder were smooth, moist and comfortable again. That's because Udder Butter is the ointment that combines an effective antiseptic with lanolin and other fine lubricants.

"Udder Butter fights the

growth of bacteria, too, and it's good for sun and windburned muzzle, cuts, wounds and abrasions for all animals. Now I get routine treatments with Udder Butter, so my teats and udder stay smooth and healthy.

"You know, I thought all teat-and-udder preparations had a harsh chemical odor, and were hard to wash off at milking time. But not Udder Butter! Thanks to its self-emulsifying formula, it washes right off with warm soapy water. And it has a refreshing vanilla aroma, so it's pleasant to use.

"Now I'm telling all my sisters to ask their dairyman to get Udder Butter. Whether it's the 7 ounce tube, the 28 ounce tub or the 7 pound pail, as long as it's Udder Butter, it's a container of contentment!"
