THE DRY TOILET
Self-Contained Composting Toilet Needs No Water Or Chemicals

Replaces conventional septic systems with a self-contained bioconversion appliance • Eliminates wastewater discharge • Constructed from rugged stainless steel and non-porous plastic • Features positive venting for odorless operation • Easily maintained • The compact HUMUS 80 occupies only 25" x 33" of floor space

MINI-STOKER
This Coal Stove Provides Automated Carefree Operation

New technology for an old idea Old Mill's Mini Stoker is a coal burning stove with an automatic coal feeding system. Designed without grates the Mini Stoker eliminates bothersome ash shake down. Large ash box allows for ash removal only once every two days. The large hopper holds 75 lbs. of rice coal producing continual duration of burn between 20 hours at maximum temperature to 50 hours at minimum temperature depending on your selection. The Mini Stoker is the answer to maximum heating efficiency of the longest duration with care free operation

MARYLAND TOBACCO

"The Art of Baling Becomes A Reality" over the course of history. Maryland tobacco has found its way to market in a variety of forms. From barrels to burlap sheets, to tied leaves. Now, a new method has been designed which makes packed tobacco more manageable.

A baling box machine can be used which puts up tobacco in 22 inch bales that weigh 75 to 80 lbs. These can easily be stacked or stored.

The basic machine is a three-bin model where tobacco is laid in according to grade. The tobacco is compressed into bales by use of an hydraulic cylinder powered by air. A jack type system can be used for those who may not have electric available. After the bale is compressed, it must be tied with cotton twine.

The use of the three-bin press allows more tobacco to be processed in less time.

For more information and details on these new tobacco press units - Call LANCASTER SILO CO., INC. We have units in stock for sale.

We feel your Tobacco is worth more in a Lancaster Bale Box
