**Air Brake Unit Also In Stock**

**DICKEY-john DiGMT Grain Moisture Tester**

The Dickey-john Grain Moisture Tester measures moisture content automatically. You simply drop a handful of grain into the sample cell. There is no need to read a dial or chart and no thermometers. As soon as you pour the grain sample into the testing cup, a digital readout is displayed which shows the moisture content of the sample. A direct readout is also displayed for temperature at the touch of a pressure sensitive switch. Models are available with built-in adapters for corn, soybeans, wheat and other grains. Conversion charts are provided for other grains.

- **GRAIN TESTER** Remanufactured, New Warranty, In Stock **ONLY.....\$169.75**
- **FORAGE MODEL** List...\$310 **CASH.....\$215**

**Simple, four-step operation**

- 1** Place the tester on a steady level surface. Then lift the protective cover up and slide it down out of the way.
- 2** Use the sample cup to pour grain into the testing cell. Pour slowly and steadily taking about eight to ten seconds to empty the sample cup. A readout will appear automatically.
- 3** Wait at least fifteen seconds. Then press the temperature compensation switch for a direct readout of the moisture content of the grain listed on that switch. Refer to the appropriate chart for other grains.
- 4** Empty the tester by turning it over if you should forget to empty the test cell, the tester will shut itself off automatically after two minutes.
