Ratchet Strap TIE DOWN

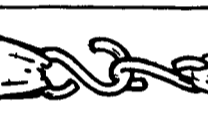

- 10 Ft. **\$21.88**
- 15 Ft. **\$24.88**
- 20 Ft. **\$29.88**

Instructions
Crease webbing and insert the crease (1) through slot (2) in the ratchet shaft. Be sure the webbing is not twisted. Pull loop through slot until each end of strap is at the desired length. The frame may be placed anywhere on the length of webbing by adjusting length of the loop. Keep at least a 6" loop so that webbing does not slip out of slot when strap is tightened. Winding too much webbing around shaft reduces the mechanical advantage. To avoid winding up too much webbing, lengthen loop.

To release the Ratchet Strap, increase the tension on the strap slightly (to relieve the pressure on the pawl) then depress the pawl as shown, and unwind.

Ratchet Straps Have 100's of Uses!

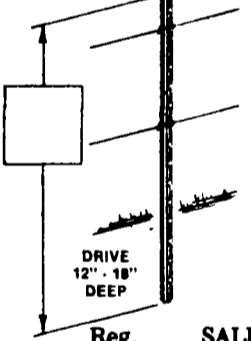

- STEEL FOR STRENGTH
- 1½" NYLON WEBBING
- SPECIAL PLATING
- DOUBLE TOOTH PAWL

A few suggested ways to secure "S" hooks Attach "S" hooks to frame or other structural member. When attaching "S" hooks to eye bolts, make certain that eye bolts are the same diameter (5/16") as the "S" hooks for maximum strength. Attach "S" hooks together and tighten.
