**THE SNATCHER**

**It's Wake Up Time**

**You Will Benefit By Using A Snatcher**

**MAGNETIC FEED HOPPER**

Made of Stainless Steel Size 14"x20" and 18"x20" tapered to 12"x14" at the bottom. Has 7 ft. of catching space 2" wide is loaded with strong magnets, all feed must pass within 1 1/4" of the magnets, it will handle all kinds of short feed, grain, or silage EXCEPT caked or hard lumpy feed - Silage. It has no moving parts - will not rust or deteriorate. One steer or dairy animal will pay for several of these hoppers. Other sizes available by request.

**A TESTIMONY FROM ONE OF OUR CUSTOMERS**

"I purchased a Snatcher in the fall of 1985 We installed it below the TMR Mixer Unit I am using a mixture of corn silage, haylage and ground ear corn. The Snatcher is installed above the conveyor that carries feed to the feed bunk. It is surprising the amount of metal we have collected since using the Snatcher It has picked up nails, wire, springs and pieces of metal My reason for purchasing the Snatcher was that I lost a high priced first calf heifer due to metal in the Spring of 1985. Since using the Snatcher we have had no problems with hardware in our cattle Yours, D. Witmer, Lancaster Co., PA

Mr. Witmer is considered a good dairyman, but discovered that he still needed protection against metal. We must again claim that this is a very cheap type of insurance!

We also have Magnetic Bars covered with Stainless Steel, for use where the Snatcher does not apply.
