

The best numbers for your bottom line.

One way to get better numbers on your bottom line is to plant the best numbers you can in the spring. Which is why farmers are planting more acres to Pioneer® brand

hybrids every year. They know Pioneer hybrids, developed from exclusive lines, are their best chance at bigger yields and better numbers.

Are you sure you're
planting enough Pioneer?
BRAND SEED CORN

3744

Performance wise, 3744 is tough to beat. Besides outyielding the competition by a wide margin over the last three years, 3744 usually dries down faster. It has excellent root and stalk strength, resists Northern, Southern and Carbonum Leaf Blights, and does well under higher populations and higher management or irrigation.

3352

This newcomer has already proven itself as the yield leader for its maturity. Over the last three years in this area, 3352 holds a significant yield advantage against competitive hybrids. Now, that kind of performance speaks for itself. But besides yields, 3352 has very good emergence and early vigor along with excellent stay green and leaf disease resistance against Northern and Southern Leaf Blights, Eyespot and Gray Leafspot. This hybrid is going to surprise a lot of folks.

3378

A leading hybrid with the ability to deliver big, hefty yields in poor growing seasons as well as good growing seasons. 3378 owes much of this success to its hearty agronomic traits like outstanding plant health, superb standability, fast emergence, strong drought tolerance and ears that "flex" to accommodate growing conditions. With so much going for it, it's not hard to see why 3378 is a lot of growers' favorite corn. Plant some and you'll be convinced too.

Living, Learning & Planting PIONEER.
BRAND SEEDS
