FUERST F-L-E-X-I-B-L-E TINE HARROW® ADJUSTABLE PENETRATION FOR GREATER VERSATILITY -- HERCULES ILLUSTRATED

HERCULES — Faster and Safer at any Speed!

Unique tine design and exclusive spreader bars allow much greater speed save labor time and money. Others recommend operation at 3 1/2 to 4 m.p.h. (at higher speeds they skip jump and skim the surface losing effectiveness) See chart for added acreage covered by Hercules

Acres covered per hour at various speeds

Width of Row	3 m.p.h.	3 1/2 m.p.h.	4 m.p.h.	4 1/2 m.p.h.	5 m.p.h.	6 m.p.h.	7 m.p.h.	8 m.p.h.

Our Loss - Your Gain, But They Must Go!

Gehl has the answer to every spreading need. And Binkley and Hurst Bros., Inc. has a good deal waiting for you!

a. Solid

If you handle mostly solid manure, the Gehl 100 Series box spreader should be your choice. It's built to give you more years of service. A specially constructed floor with "Clad Tuff" protection prevents the apron from freezing to the floor. The Flex-Ten steel frame has more strength than ordinary steel. And the copper bearing steel sides form a self-healing rust scale that prevents pitting. Six sizes are available with load capacities from 135 up to 425 bushels heaped (243 cu. ft.)

100 Series

b. Semi-Solid

The Gehl 500 Series gets semi-solid manure onto your fields fast and economically. Loading is easy from barn cleaner or bucket with the efficient open top design. An internal chopper-type auger blends manure and forces it to the oversized heavy-duty rear fan for wide, even discharge patterns. Engineered to handle high volumes, it can spread up to 1500 gallons of semi-solid manure in 2.5 minutes with uniform patterns up to 50 feet.

500 Series

c. Liquid

If you handle only liquid manure, a Gehl 700 Series liquid tanker should be your choice. Featuring an internal auger, it spreads evenly up or down. Plus two discharge outlets let you choose either high application rates and fast unloading, or moderate application rates. And a float valve controls the flow during loading.

700 Series

d. All of the above

The one spreader to do it all is the Gehl 300 Series spreader. Let you spread all three solids, semi, or liquid manure. The heavy-duty square tub auger makes the difference. Turning at 10 RPM, it provides a unique pulse action that breaks up manure in the tank. Specially formed paddles stir through clumps and discharge steadily. Constant flow to the discharge. The auger can be powered up and down to control the spreader and frozen material. Variable discharge gives you complete application control.

300 Series
