Winter Discounts On 8' & 9' Silage Bags To Fit All Baggers

THE NEW ROUND BALE WRAPPER
Round Bale Wrapping — An Economical Efficient Method Of Making Silage

This is the Silawrap system:

- The lift-arm places the bale on the turn table.
- Silawrap film is then attached to one of the bale strings.
- As the turn table is rotating, the rollers will slowly turn the bale.
- The Silawrap film is stretched around the bale overlapping 2-3-4 or 5 times according to the setting of the gears.
- The film is cut, film end secured and bale tipped off.

Saves time and money.

The time taken to wrap one bale is about a minute. Allowing for transporting bales to and from the machine, one man can still wrap 50 bales in 1.5 hours and therefore labour costs are dramatically reduced. Hay and straw can also be wrapped, thus avoiding indoor storage and releasing existing buildings for other uses. 3.58 per bale.
