**May-Co Plastic SILO LINERS**

For silos with or without unloaders

For fermenting crops, such as alfalfa, rye, corn and high moisture grains, certain bacteria change carbohydrates into organic acids, principally lactic and acetic acids. These acids are nature's own food preservatives and mold inhibitors. When enough of these acids are produced, the fermentation stops and the feed is preserved. However, the bacteria that make these acids do not grow in the presence of oxygen. The flow of oxygen can be eliminated by installing a MAY-CO SILO LINER inside your silo. In an oxygen free silo the silage will not shrink, will not freeze fast to the walls, will not mold or heat in hot weather, and will produce more T.D.N. and digestible protein without an additive.

**AGRI-PAC** Introducing **THE NEW ROUND BALE WRAPPER**  
Round Bale Wrapping —  
An Economical Efficient Method Of Making Silage

**This is the Silawrap system:**

- The lift-arm places the bale on the turn table.
- Silawrap film is then attached to one of the bale strings.
- As the turn table is rotating, the rollers will slowly turn the bale.
- The Silawrap film is stretched around the bale overlapping 2-3-4 or 5 times according to the setting of the gears.
- The film is cut, film end secured and bale tipped off.

**NEW IN '87**  
• Round Bale Wrappers  
• Bale Tube Baggers  
• Headgate Baggers  
• Grain Baggers For Corn Storage

**We Have Silage Bags & Hay Bags  
To Fit All Baggers At Direct Manufacturer's Prices**
