THE ANSWER TO LOW-LABOR MULTIPLE FEEDING WAS RIGHT UNDER OUR NOSES ALL THE TIME... AND IT ISN'T COMPUTERIZED!

It took a dairyman to invent such a perfect feeder.

GRAIN BRAIN

We call this exciting new Starline® feeder, Grain Brain™ because it thinks for itself. Here's how it works. When you do your regular feeding, you also fill your Grain Brain™ multi-feeders. Grain Brain™ does the rest. At the time you have preset into Grain Brain™ the multi-feeders drop feed for each cow's next feeding. That means you go from two or three-time to four or six time-per-day feeding with no extra labor!

Building dependable equipment since 1883

A Grain Brain™ that will handle a 50-cow herd will cost you approximately \$3,000, complete. Grain Brain™ is simple, easy to operate, reliable and capable of paying for itself in less than a year. We're anxious to tell you the whole story, so see your Starline dealer soon. By the way, "Grain Brain™" was invented by a Minnesota dairyman for his own barn. Now a lot of his neighbors have one, too. Patent Pending
