THE **FUERST**

The leader for more than 30 years

THE MOST PRACTICAL, LOW-COST IMPLEMENT YOU CAN OWN!

- Prepares Finer Seedbeds
- Incorporates Herbicides (see overleaf)
- Sheds Trash As It Works
- Scatters Livestock Droppings
- Maintains, Renovates Pastures
- Works In Seed, Fertilizer
- Maintains Tracks, Rings, Ball Diamonds, Golf Courses, Lawns and Parks

From early spring to late fall you will find the Fuerst Flexible Tine Harrow the most simple yet versatile tool ever developed. It scatters livestock droppings, helps control parasites, increases pasture usage, aerifies pastures and turf areas, prepares seedbeds, works fertilizer and seed into new seed beds and established sod, incorporates herbicides, maintains pastures, lawns, lanes, tracks, rings, parks, golf courses and ball diamonds. Specially designed tines flex to cover every inch of ground while performing all types of harrowing, dragging, smoothing, floating and scarifying operations. Ad-

just to all working conditions, maximum penetration, light penetration and as drag mat. The Fuerst F-l-e-x-i-b-l-e Tine Harrow can be used alone or behind plows, disks, spring-tooth harrows, seeders, fertilizer spreaders. Fuerst Harrows are easy to store, virtually indestructible, never need maintenance. No parts to grease, oil or tighten. From day to day and season to season - the Fuerst F-l-e-x-i-b-l-e Tine Harrow is a must for the progressive farmer, rancher, horse owner, contractor, grounds keeper.

For Your Dual Wheel Needs Now!

Non-alignment installation
Easy on, easy off...it's a snap!

In illustration removal of Snap-on Circoloc dual is done in minutes. To remove any type of dual, replace appropriate nut with a nut.

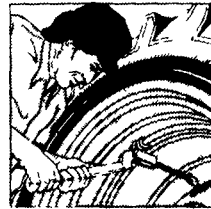

After driving your tractor for up to 1000 ft. if your dual wheel alignment is needed.

Snap-on duals

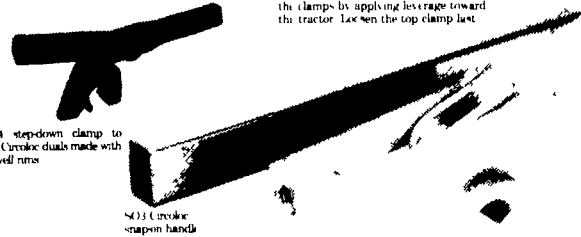

Only Snap-on Circoloc duals offer such a simple, non-alignment method of installation. They can be mounted or removed in minutes by one man, unlike bolt on wheel systems. No special tools are required for Snap-on Circoloc installation. It's so easy you can install duals and change back to singles 10 times in a season. The convenience of snap-on duals makes them perfect for operations which demand versatility. Such as when you want a single wheel in the furrow and dual wheels on the land side during plowing. Or if you want to switch duals from your tractor to your combine, it can be done in minutes right in your yard. Any time you need to use multiple wheels in a less than semi-permanent situation, Unverferth Snap-on Circoloc is the answer.

Snap-on clamps with hooks inserted into side nut. Circoloc and hook to eye nuts.

To secure the Circoloc dual, use the handle furnished to snap over the levers on the clamps. To assist in removing duals, position one of the clamp levers top center and use the handle to loosen the clamps by applying leverage toward the tractor. Loosen the top clamp last.

CND24 step-down clamp to secure Circoloc duals made with deep well nuts.

S03 Circoloc snap-on handle.

C514 Circoloc snap-on clamp.

Designed
Around
A Ring:

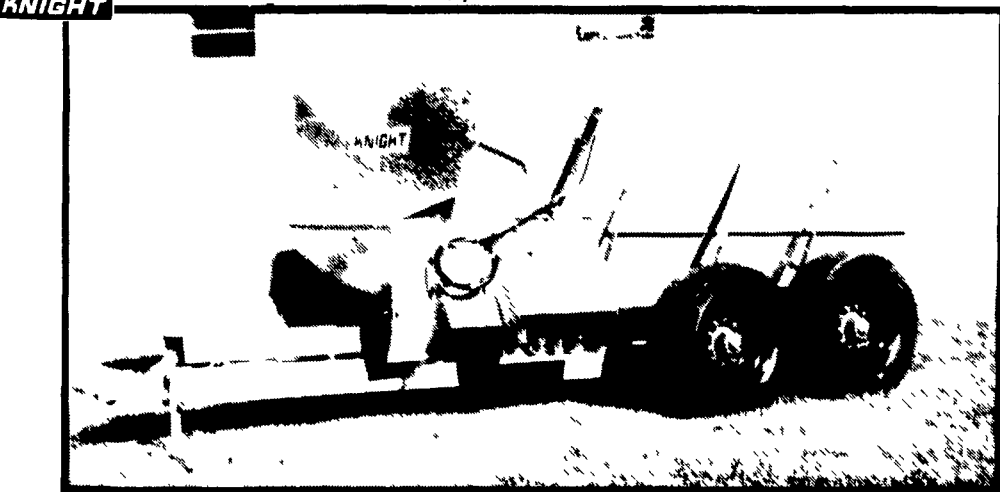

No Lost Clamps,
No Bent Rims Or Rails

The round shape of the ring insures against lost clamps. The wedge-shaped leverage foot transfers support load from ring to the rim.
