

# Here are 5 reasons to use **LORSBAN<sup>®</sup> 15G** FOOTWORLD CORN

(Only one of which is footworm.)

**#1. LORSBAN<sup>®</sup> 15G granular insecticide**  
stops the number one corn enemy —  
rootworms.

**#2. LORSBAN<sup>®</sup> 15G protects**  
corn yields by controlling  
other pests, too.

**#3. LORSBAN<sup>®</sup> 15G is T-banded**  
for safety, combining the protection  
of banded and in-furrow application.

**#4. LORSBAN<sup>®</sup> 15G is security against**  
unexpected corn pests: billbugs,  
grubs, seed corn beetles, seed corn  
maggots and wireworms.

**#5. LORSBAN<sup>®</sup> 15G is easy to handle**  
and apply.

**There is only one insecticide that gives you Corn**

**Rootworm Protection and Security. That's LORSBAN<sup>®</sup> 15G you buy at your local farm supply store. You can spray LORSBAN<sup>®</sup> 15G over the top of the plant, then band or furrow it around the plant. Or you can band LORSBAN<sup>®</sup> 15G in-furrow and around the plant. LORSBAN<sup>®</sup> 15G carries a CAUTION label, but it is easier to handle and apply than ever before. LORSBAN<sup>®</sup> 15G gives you more protection and security than any other insecticide. It's the best protection for your corn crop.**

**DO NOT SPRAY ON PLANTS WITH LEAVES OR FLOWERS.**
