

**DEUTZ  
ALLIS**

# See what sets us apart.

**Mow faster without plugging.**

## DISC MOWERS

With a Deutz-Allis 7' or 8½' SM series disc mower you can keep up a steady clip acre after acre without plugging. You'll get a clean, uniform cut, even if your crop is down, wet and tangled, thanks to rotating discs with paired knives that overlap from disc to disc.

Knives also extend beyond the ends of the cutter bar to separate mowed crop from standing material. This prevents logging and plugging. You can do two jobs at once with the 7' or 10½' disc mower conditioner. Choose from three types of conditioners to fit your needs.

Drum mowers in 5½' and 7' widths, feature the same non-plug cutting performance with added strengths designed in for heavy mowing applications.

**Square off with 100 strokes a minute.**

## SQUARE BALERS

The HD 490 square baler from Deutz-Allis is your answer for high capacity baling. The rugged plunger assembly glides smoothly on ten sealed roller bearings at 100 strokes a minute! With its "big appetite" 77" wide pickup, this high production baler makes short work of big baling jobs.

The HD 490 baler is built tough for long life and minimum maintenance. Instead of annoying shear bolts, protection from shock loads is provided by a double slip clutch. You spend more time baling, less time stopping to replace fly-wheel shear bolts. Eight ball twine box means more bales before restocking your twine supply.

See the high capacity HD 490 at your Deutz-Allis dealer.

**Rake in higher quality hay.**

## ROTARY RAKES

Deutz-Allis KS series rotary rakes help you get the most quality out of your hay.

Their gently sweeping action eliminates beating, twisting or roping. You get a loose, high and fluffy windrow for fast, thorough drying and curing. And the gentle action reduces shatter and leaf loss. To keep rain from spoiling your crop, consider a rotary tedder. It's the ideal way to accelerate the drying process, especially after a rain or heavy dew.

See the full line of rotary rakes, tedders and the combination tedder/rake at your Deutz-Allis dealer.

**Round up denser bales.**

## ROUND BALERS

Deutz-Allis GP series round balers feature steel pressure rollers in a fixed chamber to compress material from the outside in. You get smooth, densely packed bales with a firm outer wrap that resists weathering and locks nutrients in.

The wide 67" hydraulic pickup features a baffle plate that provides positive feeding even in short crops. You get a cleaner field and all the hay in the bale. A standard bale discharge bar saves you valuable baling time. A time-saving automatic tie-off system and automatic chain oiling make GP balers a pleasure to own and operate. Available in 4'x4', 4'x5' and 5'x6' sizes.
