DICKEY-john GIGMT Grain Moisture Tester

The DICKEY-john Grain Moisture Tester measures moisture content automatically. You don't have to pre-weigh the sample. There are no meters to read, no dials to set, and no thermometers to use. As soon as you pour in the grain sample, the testing sequence begins. A digital readout is displayed when the proper weight of the sample has entered the test chamber. The readout is corrected for temperature at the touch of a pressure sensitive switch. Models are available with direct readouts for corn, soybeans or wheat, and a theoretical conversion chart is provided for other grains.
