

AREA FAIR, JULY 26TH THRU AUGUST 1ST

YOU GET MORE WITH THE NEW CASE INTERNATIONAL 1600 AXIAL FLOW

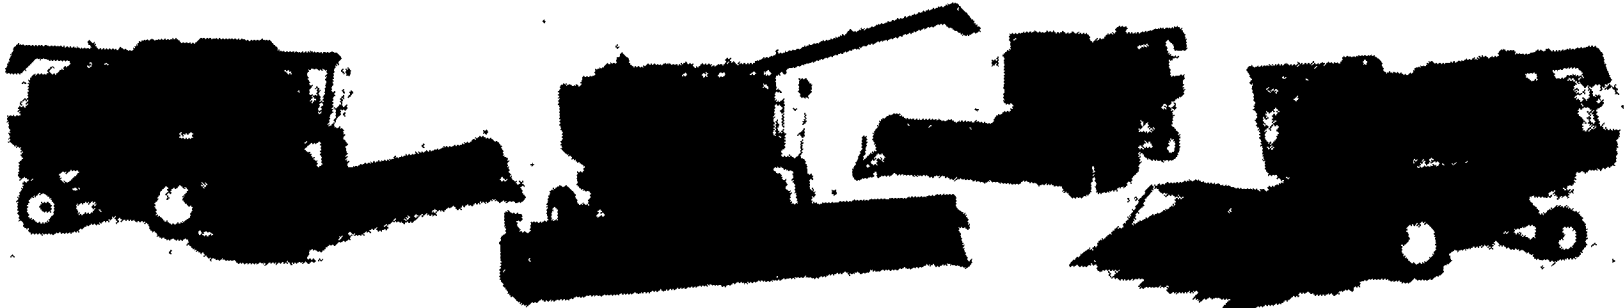

Axial-Flow has always been a clean, simple, efficient system. Now, with the 1600's increased threshing and separating area, it does an even more complete job.

The Axial-Flow system threshes grain several times (not just once) as it moves rearward, spiraling gently around and around the single rotor. Instead of a troublesome system of straw walkers, Axial-Flow uses simple separating grates and

the power of centrifugal force.

Threshing and separating are accomplished in one highly efficient operation within the rotor and cage. You'll save a lot of grain that conventional combines miss. And it'll be cleaner grain because Axial-Flow takes the time to be gentle and thorough.

THERE IS AN AXIAL-FLOW FOR YOU
